Professional Summary

Full-Stack Software Developer with hands-on experience building and deploying modern web applications using React, Next.js, Node.js, Express.js, MongoDB, and Firebase. Experienced in developing RESTful APIs, authentication systems, real-time applications, and responsive user interfaces. Strong interest in building scalable, maintainable software and solving real-world problems through clean engineering practices.

Education

Vellore Institute Of Technology- Amaravati

B.Tech in Computer Science

2023 – 2027

CGPA: 8.42

Technical Skills

Programming Languages: Java, Python, C, JavaScript

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Firebase Firestore, SQL

Tools & Technologies: Git, GitHub, Linux (Fedora), Vercel

Relevant Coursework: Data Structures, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Projects

ProjectPulse | *React, Node.js, Express, MongoDB, JWT, Google OAuth 2.0, Recharts, Tailwind CSS* **Live | GitHub**

- Built a full-stack project management platform with JWT and Google OAuth 2.0 authentication, and role-based access control (RBAC) enforced via Express middleware across all API resources.
- Designed a normalized MongoDB schema for Users, Projects, Tasks, and Comments using reference-based relationships, and built a RESTful API with 25+ endpoints and centralized error handling.
- Engineered an analytics dashboard using MongoDB's aggregation pipeline to compute dynamic productivity metrics including completion rate, team contribution, and weekly trends from live data.
- Deployed the application using Vercel, Render, and MongoDB Atlas, with a custom-designed UI system built from scratch using React and Tailwind CSS.

CollabSheet | *Next.js, TypeScript, Firebase, Tailwind CSS*

Live | GitHub

- Built a real-time collaborative spreadsheet supporting simultaneous multi-user editing using Firestore and Firebase Realtime Database.
- Implemented a custom formula engine supporting SUM, AVERAGE, MAX, MIN, and arithmetic expressions with cell references.
- Developed a real-time collaborator presence system displaying active users, cursor colors, and selected cells.
- Added features including keyboard navigation, row/column resizing, cell formatting, dark mode, CSV export, Google OAuth, guest authentication, and optimized writes using debouncing.

Personal Portfolio Website | *Next.js, TypeScript, Tailwind CSS, Framer Motion*

Live | GitHub

- Built a modern, fully responsive developer portfolio showcasing projects, technical skills, resume, and contact information through an intuitive single-page interface.
- Implemented smooth page transitions, interactive UI components, and engaging animations using Framer Motion to enhance user experience while maintaining accessibility and performance.
- Optimized the application for responsiveness, fast loading, and seamless deployment using GitHub Pages with an automated CI/CD workflow through GitHub Actions.

Certifications

- **Data Science and Business Analytics** – Blackbucks
- **LFS101: Introduction to Linux** – The Linux Foundation
